SRS Adapter Not validated for HyperArc® for Portrait™ & S-Type Devices

Flexibility to Perform SRS Treatments with Portrait™ & S-Type Devices

The SRS Adapter is a non-invasive solution that enables sub-millimetric positioning for stereotactic radiosurgery treatments on the Portrait™ and S-type devices. The system reduces motion, allowing for maximum dose to the tumor while minimizing radiation delivered to the surrounding healthy tissue.

SRS Adapter shown on Portrait™ with Cushion Support and MOLDCARE®

Clinical Advantages:

- Enables treatment of SRS and multiple lesions with a single isocenter when combined with Encompass™ SRS Fibreplast® Masks
- Accommodates a variety of SRS headrests and cushion supports for a fully customizable setup
- Easy to setup and can help to minimize procedure time and cost.
