Greater Flexibility with SRS Treatments

SRS Adapter for Portrait™ & S-Type Devices
The SRS Adapter is a non-invasive solution that enables sub-millimetric positioning for stereotactic radiosurgery treatments on the Portrait™ and S-type devices. The system reduces motion, allowing for maximum dose to the tumor while minimizing radiation delivered to the surrounding healthy tissue.

Clinical Advantages:

• Enables treatment of SRS and multiple lesions with a single isocenter when combined with Encompass™ SRS Fibreplast® Masks
• Accommodates a variety of SRS headrests and cushion supports for a fully customizable setup
• Easy to setup and can help to minimize procedure time and cost.

SRS Adapter is not validated for HyperArc® for Portrait™ & S-Type Devices.

Encompass™ SRS Fibreplast® System with Optional IntegraBite™

Patent(s) Pending

visionart COMPATIBLE

RT-4552
Portrait™ Intracranial, Head & Neck Device easily converts to perform SRS treatments with the SRS Adapter.
SRS Headrests

SRS Headrests

SRS headrests are available in different heights for positioning patients in a comfortable, neutral head and neck position. They support the patient’s head while forming the Encompass™ SRS Fibreplast® Mask for simulation.
