RapidHeat Oven

165F
00:05
The RapidHeat™ Oven quickly reaches working temperatures and provides an easy to use method to heat Aquaplast RT™ and Fibreplast® thermoplastic masks as well as Aquaplast RT™ Custom Bolus™. The design envelops the thermoplastic with hot air evenly softening the mask or bolus for molding. The RapidHeat™ Oven features an easy to read digital timer and temperature control. The two sliding racks boast a non-stick coating which reduces the potential for sticking of the thermoplastic. The large interior of the oven has the ability to heat multiple masks simultaneously. For added safety the RapidHeat™ Oven automatically shuts off after 2 hours of inactivity.

Additional Features:

- Minimizes cross contamination
- Non-stick racks for easy cleaning
- Easy to read 7.5 cm digital display

30"   32"

19.1"

Outer dimensions: 32"w x 30"d x 19.1"h (inches)
                     81.3w x 76.2d x 48.5h cm
Internal dimensions: 27"w x 21"d x10"h (inches)
                     68.6w x 53.3d x25.4h cm

Features

Digital Display

RapidHeat™ has a large 7.5 cm high digital display that features a Quick Start Guide to help easily navigate operating the oven. The digital temperature control can be used in a programmable or manual timer mode, increasing work flow efficiencies. The arrow indicators adjust Time/Temperature and the Start/Stop function allows you to easily preheat the oven while prepping your patient.

No more need for external timers, the digital display includes a timer that counts down from the designated time and alerts you when ready. The time can be set accordingly for different masks and Aquaplast RT™ Custom Bolus™.
